## **RIDING IS DECIDING**

This past year will go down as a watershed for putting cycling for transportation up front and center in our country. With gas hitting four bucks a gallon in mid-summer, there was never a better time to ditch your car and get on a bike. Suddenly, the bike was no longer viewed solely as a toy for recreation and racing, instead we noticed that our bike is a great way to get to work, to school and to the corner mini-mart. We remembered that our first bike was a gift of freedom from our parents, and we discovered that our old bike was a gift of freedom from the gas pump.

Bikes still rule as the most efficient mode of transport ever devised. In their most basic form they're fairly simple machines that are relatively accessible to a large group of people around the globe. They're quick and nimble in a gridlocked urban landscape, and they have a tiny carbon footprint compared to a car.

There's no need to wait. Decide to ride and feel the freedom of energy independence today. Don't hang around for our national leadership to kick the oil habit. Vote with your legs. Decide to ride and feel empowered instead of enslaved.

Of course, you'll need some gear to lug your stuff around on your bike. We can help! We make the finest bike bags your hard-earned money can buy.
